

International Journal of Modern Engineering Research (IJMER)

Volume : 14 Issue : 5

ISSN : 2249-6645

Sep.-Oct. - 2024

Contents :

Analysis of Land Degradation in Fufore and Yola-North Local Government Areas of Adamawa State, Nigeria	01-07
Dynamical Virtual-fenced Warning Technology to Prevent Bridge Pier from Collision with Ships	08-15
Performance Threshold Levels Of Mobile Network Portability In South South Nigeria	16-23
Optimization of Pichia pastoris Genomic DNA Extraction Methods and PCR Systems	24-28
Optimization of Dual Plasmid Transformation Conditions for Large Plasmids in Escherichia coli	29-33
Modeling the flow of gases impure with water	34-43
Gamification in Business: Enhancing Job Satisfaction through Game Mechanics	44-47
Smart Energy Management Systems for Optimizing Solar Power Storage and Utilization in Household Applications	48-53
A Study on the Relationship between Employees' Perception of Transformational Leadership and Self-Efficacy in Yun'An Industrial College, China	54-62
Integrating AI with ITIL® 4 Framework for Enhanced IT Service Management	63-71
Security Management in Contact Centers: Challenges and Best Practices	72-78
Cybersecurity Aspects in Gamification: A Comprehensive Overview	79-87
Quantum Communication Through Entangled Particles in an Alternate Reality - Breaking the Speed-of-Light Barrier and Beyond	88-98
Revolutionizing Customer Engagement: The Unseen Potential of AI in Modern Marketing	99-103
Fermi statistics method applied to model macroscopic demographic data	104-120
Application of a Nanostructured Aluminium Alloy in Internal Combustion Engine Pistons for Mass Reduction	121-141
Evaluation and Availability of Nutrients in Soil Samples Collected from the Shahada Region	142-147
A Test Rig Setup for Performance Evaluation of Power Transmission Elements	148-152
