

International Journal of Modern Engineering Research (IJMER)

Volume : 15 Issue : 3

ISSN : 2249-6645

May-June 2025

Contents :

Quasi-Quantum Photosynthesis - A Novel Approach to Sustainable Water Generation from Atmospheric Moisture	01-19
AR application in safety inspections on an infusion pump	20-23
Securing the Revolution: An Academic Analysis of 5G Security, Zero Trust Architecture, and AI/ML Integration	24-50
Accelerating the Future: The Synergy of 5G and Edge Computing in Realizing Saudi Arabia's Vision 2030	51-73
From 5G-Advanced to 6G: An Evolutionary Roadmap Towards AI-Native and Cloud-Native Intelligent Networks	74-104
Entrepreneurial Engineering: Enhancing Power Distribution Engineering Network For Effective Service Delivery	105-113
Usage of Counterfeit Insights within the Advanced Transformation of Data Frameworks with in the Mechanical Time 5.0	114-121
Development of Spiral Curry Puff Production Machine for Small and Medium Enterprises in Malaysia	122-130
Research on the development and market application of mixed fruit and vegetable milk products	131-135
Reflections on Teaching Reform in Bioengineering Talent Cultivation Based on Outcome-Based Education	136-140
Design And Implementation of a Remote Monitoring and Control System for Tomato Storage and Preservation Using Internet of Things Technology	141-154
Three-Phase Oil-type Transformer Modeling and Magnetic Flux Density Analysis Using ANSYS Maxwell	155-160
Post-Event Evaluation and Assessment of Flash Flood Dam Efficiency	161-168
A Systematic Study of Multimodal Emotion Detection in Customer System	169-173
